

Once again, WDNR, UW-Extension Lakes, and UW-Trout Lake Station are partnering up to offer several one-day aquatic plant identification workshops this June. Two locations are being offered – Kemp Natural Resources Station in Woodruff, WI, and Waypost Camp on Mission Lake in Hatley, WI. On-site lodging is available at both locations if needed, but is limited so reserve your space early. These workshops always fill up quickly so register soon. CLMN volunteers that are engaged in aquatic plant or aquatic invasive species monitoring are encouraged to attend.

All workshops are for a single day and lunch is included in your registration fee.

Please see below for workshop details and registration:

I hope to see many of you there! Please feel free to contact me with any questions.
